(Cell Metabolism 11, 402–411; May 5, 2010)

In the preparation of this manuscript, we made a mistake in the labeling of Figures 1C and 1D. On page 403, line 13 of the figure legend, the duration of high-fat feeding should be “3 weeks,” not “3 months.”

This correction does not affect the data or the conclusions of the paper, and we apologize for any confusion the error might have caused.
